WarehouseNet is warehouse management software for inventory, logistics and distribution operation. Extremely suitable for warehouse, distribution center, MRP for manufacturer, logistic services and storage operation.

Leftover reports with different grouping, by article no, item, brand name, description, supplier and specification, FIFO, storage breakdown, storage charges calculation, low level alert and stock checking by location. Export closing stock report for accounting audit at the year end to save manpower and time to re-type by excel. Expiry date alert avoid expires and waste of day limited items. Storage days report reduced the storage day and hence minimizes depreciation percentage.

Reports on all stock-in and stock-out movement grouping by item, customer, brand name, supplier, delivery order, recipient and job order. This is

used to act as an audit checking against supplier deliveries and customer invoice amount or quantity.

Multi languages with Chinese / English Bilingual interface and reports, suitable for multi-national companies with office in China and overseas countries.

Remote Access WarehouseNet Database over internet, able to view record details from overseas. (With users own Window XP or Server) Multiple user access to the database at the same time. Workgroup and multi-user functionality.
